Simulation Logs:

The data logging override settings for the model '[AutoDRIVE RZR AEB](#)' have been configured to log the following signals that are not available for logging because they have been removed from a referenced model, are inside inactive variants, or come from a source that has been commented out. These signals have been automatically removed from the data logging override settings. Save this model to avoid this warning when simulating the model in the future.

Simulation Logs:

The data logging override settings for the model '[AutoDRIVE RZR AEB](#)' have been configured to log the following signals that are not available for logging because they have been removed from a referenced model, are inside inactive variants, or come from a source that has been commented out. These signals have been automatically removed from the data logging override settings. Save this model to avoid this warning when simulating the model in the future.
